

## **METALLURGICAL ENGINEER**

A growing full-service materials testing laboratory is seeking an experienced metallurgical engineer with broad materials background for an excellent opportunity in a fast-paced, team-oriented environment with a strong customer focus. Scope of the position includes evaluations and analysis on an extensive variety of materials in support of a diverse range of industries. Minimum qualifications include an engineering degree in metallurgy or materials, plus at least three years related experience. Successful candidates will demonstrate excellent analytic ability, superior problem solving skills, and possess good experimental dexterity. In addition, strong oral and written communication skills are a must. U.S. citizenship is required due to the nature of some clients served. This is an unusual career opportunity with an established high-tech company. Excellent benefits package and tuition reimbursement options are available. This position is based in Greenville, SC. Send resume and application letter with salary requirements.
